

#GIVINGTUESDAY™

Join the movement to save compounded medications!

Giving Tuesday & Saving Compounded Medications Update

Celebrated on the Tuesday following Thanksgiving (in the U.S.) and the widely recognized shopping events Black Friday and Cyber Monday, Giving Tuesday kicks off the charitable season, when many focus on their holiday and end-of-year giving.

Now is the ideal time to focus, grow, and join together as a profession. More than ever, as the [FDA violates the core principles in removing natural agents from compounding](#), we need to come together to [save compounded medications](#).

The FDA continues its review process of ingredients very commonly used by naturopathic doctors. In the last September meeting, the AANP was represented by Alan Dumoff, Paul Anderson, ND, and Virginia Osborne, ND. We had more success this time, with CoQ10, Creatine Monohydrate, and Pyridoxal 5 Phosphate (P5P) being approved, along with Alpha Lipoic Acid for oral use only. Denied was ALA for IV use and Quercetin. The FDA still has dozens of ingredients under review, and the AANP is also working on a Citizens Petition to challenge the FDA's process that has already lead to denials for common ingredients like Curcumin, Boswelvia, Artemesia and many many more.

Please [donate now](#) to support our legal and advocacy efforts Protecting Patient Access to Compounded Medications!

Can you [give today](#) in support of saving compounded medications? If you do not have the means to give, ask your colleague to become a member. The [membership value](#) far outweighs the cost to be a member and the AANP benefits from strength in numbers!

Thank you for your support.

Sincerely,

AANP Staff
